Contents

1	Linear Transformations	1
1.1	Rank + Nullity Theorems (for Linear Maps)	3
1.2	Matrix of a Linear Transformation	6
1.3	Isomorphisms	12
1.4	Change of Basis Theorem for T_A	18
2	Polynomials over a field	20
2.1	Lagrange Interpolation Polynomials	21
2.2	Division of polynomials	24
2.2.1	Euclid's Division Theorem	24
2.2.2	Euclid's Division Algorithm	25
2.3	Irreducible Polynomials	26
2.4	Minimum Polynomial of a (Square) Matrix	32
2.5	Construction of a field of p^n elements	38
2.6	Characteristic and Minimum Polynomial of a Transformation	41
2.6.1	$M_{n \times n}(F[x])$ — Ring of Polynomial Matrices	42
2.6.2	$M_{n \times n}(F)[y]$ — Ring of Matrix Polynomials	43
3	Invariant subspaces	53
3.1	T -cyclic subspaces	54
3.1.1	A nice proof of the Cayley-Hamilton theorem	57
3.2	An Algorithm for Finding m_T	58
3.3	Primary Decomposition Theorem	61
4	The Jordan Canonical Form	65
4.1	The Matthews' dot diagram	66
4.2	Two Jordan Canonical Form Examples	71
4.2.1	Example (a):	71
4.2.2	Example (b):	73
4.3	Uniqueness of the Jordan form	75
4.4	Non-derogatory matrices and transformations	78
4.5	Calculating A^m , where $A \in M_{n \times n}(\mathbb{C})$	79
4.6	Calculating e^A , where $A \in M_{n \times n}(\mathbb{C})$	81
4.7	Properties of the exponential of a complex matrix	82
4.8	Systems of differential equations	87
4.9	Markov matrices	89
4.10	The Real Jordan Form	94
4.10.1	Motivation	94

4.10.2	Determining the real Jordan form	95
4.10.3	A real algorithm for finding the real Jordan form . . .	100
5	The Rational Canonical Form	105
5.1	Uniqueness of the Rational Canonical Form	110
5.2	Deductions from the Rational Canonical Form	111
5.3	Elementary divisors and invariant factors	115
5.3.1	Elementary Divisors	115
5.3.2	Invariant Factors	116
6	The Smith Canonical Form	120
6.1	Equivalence of Polynomial Matrices	120
6.1.1	Determinantal Divisors	121
6.2	Smith Canonical Form	122
6.2.1	Uniqueness of the Smith Canonical Form	125
6.3	Invariant factors of a polynomial matrix	125
7	Various Applications of Rational Canonical Forms	131
7.1	An Application to commuting transformations	131
7.2	Tensor products and the Byrnes-Gauger theorem	135
7.2.1	Properties of the tensor product of matrices	136
8	Further directions in linear algebra	143
