

**University of Cologne. Good Ideas. Since 1388.**

The **Institute for Mathematics at the University of Cologne** is seeking applications for a professorship to commence as soon as possible.

The professorship will be appointed in the field of number theory, e.g. with a research focus on modular forms, Mock Theta functions or related fields.

The successful candidate will be expected to take an active role in our existing Graduate School (Graduiertenkolleg) 'global structures' featuring Ph. D. fellowships and an extensive research and teaching program.

The University of Cologne is an equal opportunity employer in compliance with German disability laws. Applications from women and disabled persons are particularly welcome.

**The candidates are invited to submit until 22<sup>nd</sup> February, 2010 a curriculum vitae, copies of certificates, a publication list, an outline of teaching experience and a summary of their research plan to: The Dean of the Faculty of Mathematics and Natural Sciences, University of Cologne, Albertus-Magnus-Platz, D-50923 Cologne, Germany.**
